## Classic 5 Medium Studio Package

**KEY FEATURES:** The Classic 5 Medium Studio Package is our traditional analogue radio package, designed to provide a professional grade studio perfect for all Radio projects.

This package combines 'ash' finish woodwork with a full Myriad touch-screen system and the Sonifex S2 mixing desk to provide a professional and good looking studio ideal for any Radio project.

The Classic 5 offers substantial scope for customisation and future expansion as the S2 Mixer frame can accommodate a further 4 additional mixer channels and there is plenty of room for additional equipment in the upper and lower equipment racks.

Like all the studios in the Classic range, the Classic 5 includes onsite installation and training, 12 months free web streaming and a 12 month Aftercare package.

The Classic range of Studio packages provides a more traditional approach to studio furniture and design to create that classic radio studio atmosphere. Whilst the layout and aesthetics of the classic range may be retro, the equipment is bang up to date with the latest Myriad touch screen technology coupled with professional mixers and audio equipment.

The package also includes onsite delivery and setup as well as a full days training (for 1-6 people) on how to use the equipment and common radio tasks. Additional training is available at the discounted rate plus travel and accommodation.

## Other Options Worth Considering

### Professional Audio Level Processing – Make your station sound as good as possible!

#### Medium Level:

The Audessence Podblaster delivers tamper-free, professional audio levelling and dynamic limiting. Includes cables and rack mount kit.

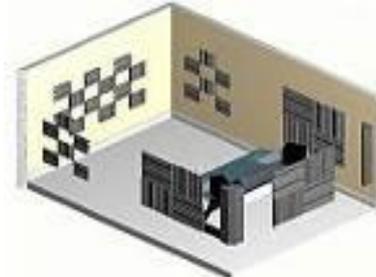

#### Professional Level:

The Broadcast Warehouse DSPX-Mini provides professional audio levelling and audio processing for outstanding results as good as stations on FM.

#### Zoom H1 Portable Recorder

Includes SD card, desk stand, 'mic' handle, wind shield, AC power adaptor, headphones & cables. Perfect for use with your MP3 Player / Recorder in the studio Package.

#### Sound Deadening Packages

To Improve the acoustic nature of the room you have designated as your studio. These fire retardant packages have a significant impact and can be installed onto most surfaces.

### Notes

Hotel Accommodation required for the engineer(s), when more than 2 hours journey time from P Squared Ltd.

Please note that a 'Day On-Site Engineering' normally means a maximum working day of 8 hours including travel time to site (but not usually the return leg of the journey). As the situation dictates, engineers can (at their discretion) work a maximum of two additional hours in any given day but only on a maximum of two consecutive days. These limits are imposed to ensure a safe and fair working environment for our employees.

12 Months Free Web stream hosting limited to 30 concurrent streams @ 64kbps mp3, the 12 months commences from the date of your installation. To commence usage of the service you will need to request that it is configured, a password and publishing point will be created and the details of how to set it up will be emailed to you. The PC will require a valid internet connection; this is not the responsibility of P Squared to provide. Larger packages are available on request. An email will be sent to you (after 11 months) offering you additional streaming before the automatic cessation of the service.
